■ **New: IML Micro Hammer**

IML Micro Hammer

Sound Velocity Measurement

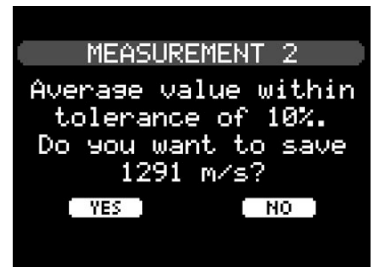

The new Micro Hammer has a much smaller, more high-sensitive sensor and we are using a new attachment method with special screws which minimizes the damage to trees. All features were well arranged and are absolutely user friendly. Due to new modern engineering techniques we were able to use small data chips to save the results on the device. The data will be stored in the electronic unit and shown on the OLED display. The integrated Bluetooth module ensures wireless downloads of your measuring data to your laptop or desktop. All components that are used on the Micro Hammer are wind and water resistant and can be used in any weather condition.

Picture shows: IML Micro Hammer

Functions and Advantages:

- **Micro technology:** Higher measuring accuracy due to the use of new digital micro sensors
- **Quick and simple application:** Easy screw attachment, much smaller sensors, quick sensor fastener
- **OLED Display:** The new high contrasted OLED display ensures clear reading of the measuring data in any weather condition
- **Integrated hardware selftest** for hammer and micro sensor
- **Safe data administration and storage**
- **USB- and Bluetooth interface**

Picture shows: Measurement in OLED display

Included Accessories:

- Electronic unit
- Hammer (Pulse generator)
- Micro-sensor (Impulse recipient)
- 10 High-grade steel screws (length 60 mm / diameter 4,0 mm) with 2 spare magnets and 1 drive cap
- Mini screwdriver IXO for turning in the screws
- USB connection cable
- USB Bluetooth adapter plug
- 100V-240V charger
- IML Software Center M-Tools Light
- Instruction manual
- Aluminum case

Picture shows: IML Micro Hammer
